

IT'S TIME

NOW IS THE MOMENT.

*When the world's clock strikes midnight,
will there still be time to turn back?*

A CLIMATE-AWARENESS NOVEL

READING SAMPLE

Introduction and back cover

Introduction

You are holding a clock. Not the paper in your hands — the other one, the one this book was written to make you hear: the quiet, second tick beneath the ordinary hours, the one that has been running since the first furnace was lit and has never once stopped. For most of history no one could hear it. That is the tragedy this story is about, and the reason it exists.

IT'S TIME is a work of fiction, but the fire in it is real. Its people are invented; the smoke, the rising water, the summits that ended in applause and nothing else, the science that was buried because it was inconvenient — those we did not have to imagine. The book moves through four centuries and three shades of story: the drama of ordinary lives, the cold reach of science fiction, and a horror that needs no monster, because the monster is our own habit of saying 'later'.

It was not written to frighten you, and even less to lecture you. It was written to make you feel something true about the only home our species has ever had — this warming, breathing, irreplaceable planet — and to hand you, at the last page, a single question you can answer with your life rather than your opinion. Read it slowly. Let yourself love the people in it before the clock takes them. And when you reach the end, remember that the message was aimed, across all that distance, at you.

IT'S TIME

NOW IS THE MOMENT

*For more than two centuries, a brass clock
has kept an hour no one dared to read.*

Elias Ashford lit the first furnace believing
smoke was the future. Generations later, his heir
buries the one truth that could save us. Among
them, women named Alma plant against the dark;
a scientist cries out in the wilderness; a boy learns
to fish at dawn... and an intelligence from the
future reconstructs how we ran out of time.

*Four centuries. One clock. A warning that travels through time.
Drama · Science fiction · Quiet horror.*

***"It's time.
It always was."***

CLAUDIO MUÑOZ
Author · BINORD Advisory Co.

Claudio Muñoz is the founder of BINORD Advisory Co.,
a consultancy devoted to carbon footprint and
decarbonization under the motto "Building the Road to
Zero Carbon." IT'S TIME was born of that same mission:
to turn climate awareness into emotion, and emotion into action.

ISBN — development edition

BINORD ADVISORY CO.
Building the Road to Zero Carbon
A climate-awareness novel

This was only the beginning.

The complete novel spans four centuries, five parts and twenty-three illustrated chapters, to an ending you won't forget.
